

Caribbean Nursing Summit on Sexual and Reproductive Health
St. Maarten April 2009

Project Progress Report
September 2009

Project title: Knowledge and attitudes regarding emergency contraception among Puerto Rican baccalaureate level nursing students.

Performed Activities:

- Literature Review on topic almost completed.
- A 37 question survey was developed and divided into 3 components: knowledge (15), behaviors (5), and attitudes (12). This survey also includes a section on the participant's demographical data (5 questions). The survey was developed in Spanish since this is the target population's first language. The survey has been submitted as an adjunct document to the group Las Alquimistas for review and suggestions.

Pending Activities:

- Renew HIPAA and Human Subjects Participation Protection certificates
- Develop Informed Consent Form
